## TECHNICAL SKILLS

- **Proficient:** JavaScript, React, HTML5, CSS3, Ruby on Rails, MySQL, PostgreSQL, GitHub, Drupal 8
  - **Exposure:** PHP, Redux, Python, C++, Illustrator, Heroku, Agile Project Management
- 

## PROFESSIONAL EXPERIENCE

### OneOrigin | Software Engineer | Norwalk, CT

July 2021 - Present

- Collaborated with clients and design team to understand project requirements and implement them using PHP, Drupal 8, JavaScript and MySQL database.
- Developed functionalities (forms, validations, solr search display) using custom modules, controllers, views, and custom themes in a Drupal 8 app.
- Engineered web application pages using Twig templating to match Mockups provided by designers using PHP, Drupal, JavaScript, HTML5, and CSS3.
- Operated in an agile environment, completing Jira tickets to track the project development lifecycle.
- Constructed web app functionalities using PHP, props, routing, and lifecycle hooks to create component structure.

### Varsity Tutors | Computer Science Tutor | Remote

Nov 2020 - Present

- Enhanced students' knowledge on subjects related to Algorithms and Data Structure to aid students in executing assigned projects by building fundamentals in JavaScript, HTML5, and CSS3, ensuring 100% student pass rate.

### HappyHealJuice | Software Engineer & Co-Founder | Remote

Sep 2020 - Dec 2020

- Engineered landing page to generate an email list of targeted customers using JavaScript, React, HTML5, and CSS3.
- Integrated Mailchimp API into React front end to gather data, manage subscribers, and market our product.
- Conducted in-depth research on different marketing strategies, leading 80+ Instagram followers in 2 weeks; independently designed company logos using Illustrator.

### Advernation LLC | Software Engineer, Intern | New York, NY

May 2017 - Aug 2018

- Modified, maintained, and debugged applications utilizing JavaScript, HTML5, CSS3, WordPress, Shopify, and PhotoShop; oversaw websites for 7+ legacy clients.
- Optimized SEO through editing keywords and layouts to maximize speed and scalability, increasing Google ranking by at least 15% and improving user engagement by over 2X.
- Redesigned applications, adding new functionality to increase web traffic, generate new leads, making it usable and pleasurable using JavaScript, WordPress, and PHP.

### BDS Marketing, LLC. | Technology Consultant | New York, NY

Mar 2014 - Feb 2016

- Delivered quality support to meet the needs of 50+ clients daily while developing their skill-set in maximizing effective use of technology, leading to 40% weekly increase in sales and positive customer reviews.
- 

## EDUCATION

### Bachelor of Science in Computer Science, Brooklyn College, City University of New York

Dec 2018

---

## PROJECT WORK

### Book Escape | Software Engineer | [live](#) | [code](#)

Sep 2020

*E-commerce book website focused on enabling easy purchase of best sellers through PayPal.*

- Integrated context API, adding to cart functionality, and PayPal sandbox using JavaScript, React Native, and CSS3.
- Developed features such as popup modal, details page, quantity, and product delete to optimize app functionality and make it responsive, efficient, and interactive, utilizing JavaScript, React, and React Native.

### DoNation | Software Engineer | [live](#) | [code - front end](#) | [code - back end](#)

Aug 2019

*Charity app empowering users to research numerous charitable organizations to award donations.*

- Developed a full-stack charity application utilizing JavaScript, React, Ruby on Rails, and PostgreSQL, creating charity filtering, searching, and online payment systems.
  - Engineered Ruby on Rails back-end, implementing the Pledgeling API and Stripe API to display donation resources and build credit card payment features.
  - Constructed chatbot leveraging JavaScript and React chatbot components to provide static chat experience for users.
-
